

## COMMUNICATION SYSTEMS

The GP328 is the two-way radio solution for professionals who need to stay in contact. This practical radio can easily increase productivity by keeping users communicating, yet streamlines their radio use – allowing them to concentrate on the job at hand. With the GP328, communication could not be easier.

The GP328 comes with 2 models – 4 channel and 16 channel model to organise work groups with ease and efficiency.

### GP328 Key features and benefits

- X-pand Audio Technology - Motorola's special voice compression and expansion technology called X-PAND enables crisper, clearer and stronger audio quality, allowing you to keep communicating in any noisy environment.
- Programmable Channel Spacing of 12.5/25khz mode:
- Repeater/talkaround enable/disable:
- Internal Voice operated Transmission (VOX) - For hands-free operation, activate this option by speaking with the optional headsets.

The new WPJAC Ear Mic Plus, allows you to leave the compact microphone harness attached to the radio and to simply swap earpieces when you change shifts. This added 3.5mm suction fit connection eliminates wear on the radio, reducing repairs.

Further, personal issue of earpieces is good for hygiene and increased accountability. These earpieces are meticulously made to be comfortably worn all day long, whilst delivering crystal clear audio.

**Then just add your personal choice of earpiece!**

NB: Order earpiece separately

### Fees for Service

A quote will be provided detailing the product and service required. We can put together a package which suits your individual or corporate needs and will not proceed without the appropriate level of approval in writing.

On-line enquiries can be made through our website.
