

CROWD CONTROLLERS 3 IN 1 TORCH

Throughout Queensland there are thousands of fake identification documents being passed to crowd controllers and law enforcement officers each year. In recent times the task of identifying these documents within licensed premises in particular have become more difficult, especially with regards to the production of international drivers licenses and passports to gain entry.

The crowd controllers 3 in 1 torch makes this task much easier, whilst portraying a professional image to patrons. With 10 bright LED lights the document can be viewed under appropriate lighting conditions, the security features of the document can then be view using the 5 LED ultra violet lights (UV) of a frequency to reveal those features not visible to the naked eye.

The crowd controller 3 in 1 then can be used to identify patrons to other team members should an eviction be required through the use of the torches bright laser pointer.

The cost of the crowd controller 3 in 1 torch also includes a handy belt holder to enable the torch to be worn securely.

10 LED super bright white bulbs for visibility.

Bright laser to point out that concerning patron.
