

New Style high quality digital voice recorder with RF Transmitter MP3 Watch, with built-in 2GB Flash drive.

Queensland law, like other States in Australia, allow any person to record a conversation without the other person's knowledge as long as the person using the listening device is a party to the private conversation. (S: 43 Invasion of Privacy Act).

This fashionable metal watch has a hidden built in 2GB MP3 player inside as well as a high quality MIC for audio recording.

A perfect item for security and/or law enforcement agencies to document a conversation or for people who want to just listen to their MP3 or WMA music available on their own FM Radio in their car.

These watches are now available in Australia and can be used not only to tell the time through precision Japanese movement, but can record up to 8 hours of high quality voice recording.
