

## METAL DETECTORS

Garrett's Super Scanner, the metal detector that set the world's standard for hand-held body scanners, is now even better! Just press the ON switch, and its automatic circuitry will detect all concealed metal weapons including the smallest knives and guns. The Super Scanner features automatic tuning and battery check. No adjustments are ever necessary. When a target is located, the unit provides both an audio signal and a visual alarm. The audio alarm serves to indicate low battery status, when 10% of battery life remains, by switching to a steady tone, rather than a warble.

Standard batteries last for at least 80 hours of continuous operation. This favourite of security and law enforcement professionals everywhere has been improved with the addition of a Reduced Sensitivity mode for scanning near rebar floors, a new Grip for greater handling ease.

- Ultimate sensitivity not subject to arbitrary adjustment
- Auto tuning means no adjustments are ever necessary
- Simple and effective one switch operation
- Rugged high impact ABS case with reinforced coil compartment
- Meets or exceeds all regulatory and performance standards including the new NIJ0602.02.
- Detects medium-sized pistol from distance of 9"; large knife, up to 6"; razor blade, box cutters, handcuff keys, up to 3"; foil-wrapped drugs and electronic components from 1".
- Optional earphone attachment permits "silent scanning"
- Large scan surface for quick and thorough scanning
- No tools required to change battery (9V)?
- Sharp audible alarm and bright Red LED indicates detection of metal
- Green LED indicates detector is on, Amber LED indicates that battery is low
- Includes a 9V battery (unless optional accessories purchased)
- Measures 16"L (Length, Width, Depth 420 mm, 83 mm, 45 mm)
- Weighs 18 oz. (480gr)

**On-line orders and payments of \$198 (Inc GST) or \$220 (Inc GST) with optional accessories including a power adaptor, 9 volt rechargeable battery and a Garrett earpiece can be made through our secure website**
