

## Covert Surveillance Pen Camcorder with Audio -2GB

Sitting in your shirt pocket, standing in the pen cup or lying on the desk no-one will ever notice as you secretly capture their every move. The built in flash stores the video until it is ready to be downloaded to a computer via USB, and with 2GB of memory you'll get well over 5 hours of recording time.

The colour video is encoded on the fly through a buffer system to MPEG 4 and if the battery runs low during a recording session the pen will ensure it writes the video from the buffer to flash before shutting down. All video is captured with audio making this the perfect tool for recording confessions, secret rendezvous or interviews.

You can also use the device as a common flash drive to transport important files around safely. The pen itself is an attractive writing instrument with a gloss black finish on the main body, rubber finger grip and chrome detailing.

### Features

- \* Improved Colour CMOS sensor
- \* White Balance Adjust
- \* Rubber Finger Grip
- \* Power Adaptor
- \* Focus Range: 150mm~Infinity
- \* Internal Flash Memory: 2GB
- \* Replaceable Ink Cartridge
- \* USB cable and software included

### Technical Parameter

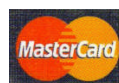

- \* Format: MPEG4 - AVI
- \* Capture Resolution: 352x288
- \* USB Charging - Internal Battery
- \* Max Audio Range 10 Meters
- \* Frame Rate: 15fps
- \* Audio Format: 128kbps PCM Audio
- \* Built In Microphone
- \* Dimension: 148mm (L) x 16mm (Diameter)

Comes with a 30 day replacement / refund warranty on return of the product.
